

# Recommended 16 Button Cursor Setup for BidPoint XL and Numonics Digitizers

In the Excel menu, go to **Digitizer|Setup Buttons**, and select Default as cursor style. Then, click on the buttons tab to set actions for the designated buttons. You can also assign different sounds to the various digitizing actions.

WAV sound files can be selected from the C:\Windows\Media Folder.

Keyboard commands:

- (minus key) = Negative Area
- (plus key) = Turn off Negative Area
- (Backspace key) = Delete Last Point
- (Enter key) = Close Line/Area

In the Numonics Wintab under **Start | Settings | Control Panel** set the Tracking to Relative and set the sensitivity to medium.

Under the Buttons tab set Button 0 to primary click, Button A to secondary click. Button 1, B, 5, 4 and 3 can be set up as Macros.

Macro setup for Numonics Wintab
